

FACT SHEET

Over 2,000,000 Americans are carriers of the genetic trait for Cooley's anemia, a fatal blood disease.

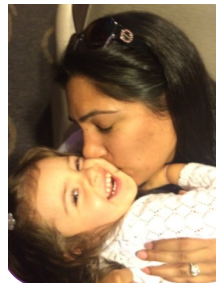

In the United States, Cooley's anemia strikes predominately those of Mediterranean and Asian Indian, South Asian and Chinese ancestry. The disease is found in 60 countries.

CHILDREN BORN TO PARENTS WHO BOTH CARRY THE TRAIT have a 1 in 4 chance with each pregnancy of inheriting the fatal form of the disease.

NOT LONG AGO, CHILDREN BORN WITH COOLEY'S ANEMIA SELDOM SURVIVED THEIR FIRST DECADE OF LIFE. Recent medical advances have increased their life span.

TO STAY ALIVE, patients must undergo blood transfusions every two weeks. Every night patients must insert a needle into their stomachs to receive painful infusions of a special drug for up to twelve hours.

THERE IS CURRENTLY NO CURE. Bone marrow transplants and gene therapy procedures, while still experimental, suggest that a cure may one day be perfected. Even with extensive treatment, life expectancy is uncertain.

*Cooley's anemia patient,
Zayna (2/13/12-1/8/15)
with her mother, Sarah*

*Children are our most precious resource.
Unfortunately, kids with Cooley's anemia
do not live to their full potential.*

*Money and blood are our
most important commodities.
If you can't give money—give blood
If you have been blessed— give both.*
